

HORUSTEC®

●●● OVERVIEW

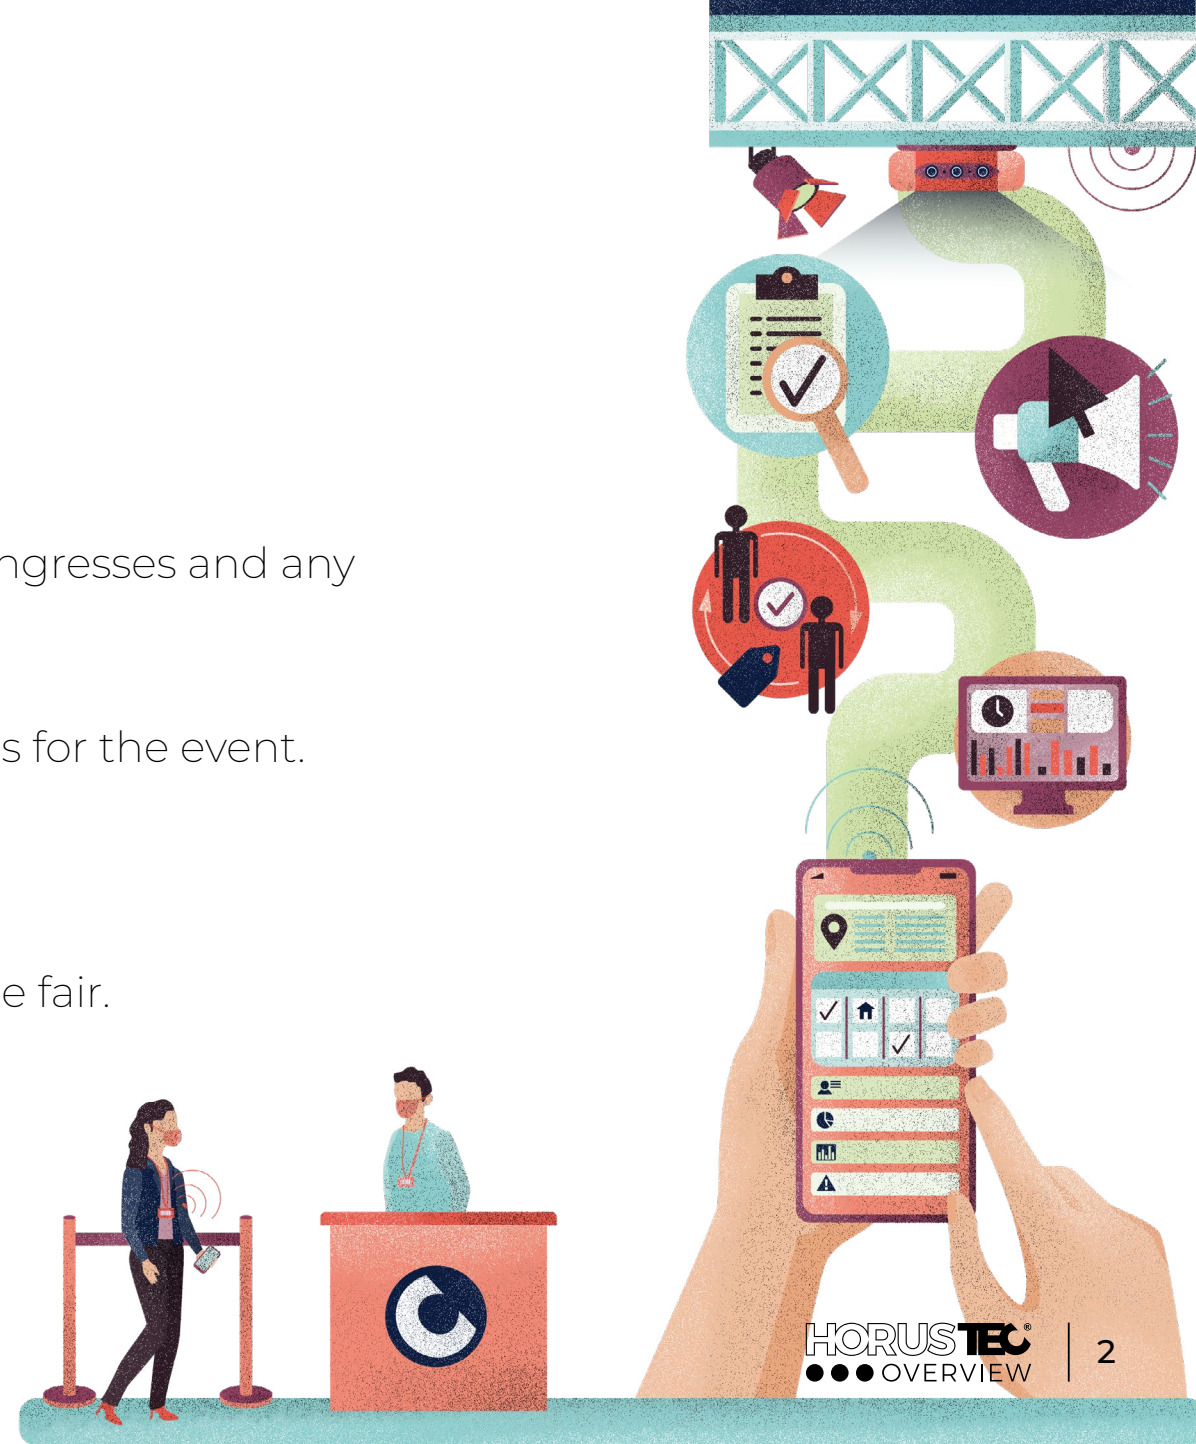

TECHNOLOGICAL SOLUTIONS
FOR SECURITY AND SAFETY
EVENT MANAGEMENT

FEATURES

What solutions can we offer?

1. Improve **data management** when organising trade fairs, congresses and any other type of event.
2. An **application** is created according to the organiser's needs for the event.
3. **Organisation of staff.**
4. Provide **exhibitors with information** on those attending the fair.

TECHNOLOGY FOR EVENT MANAGEMENT

1. RFID

1. With the accreditation, they are assigned a **unique identification code** that incorporates individual information.

2. Determine and view the distribution **in real time**.

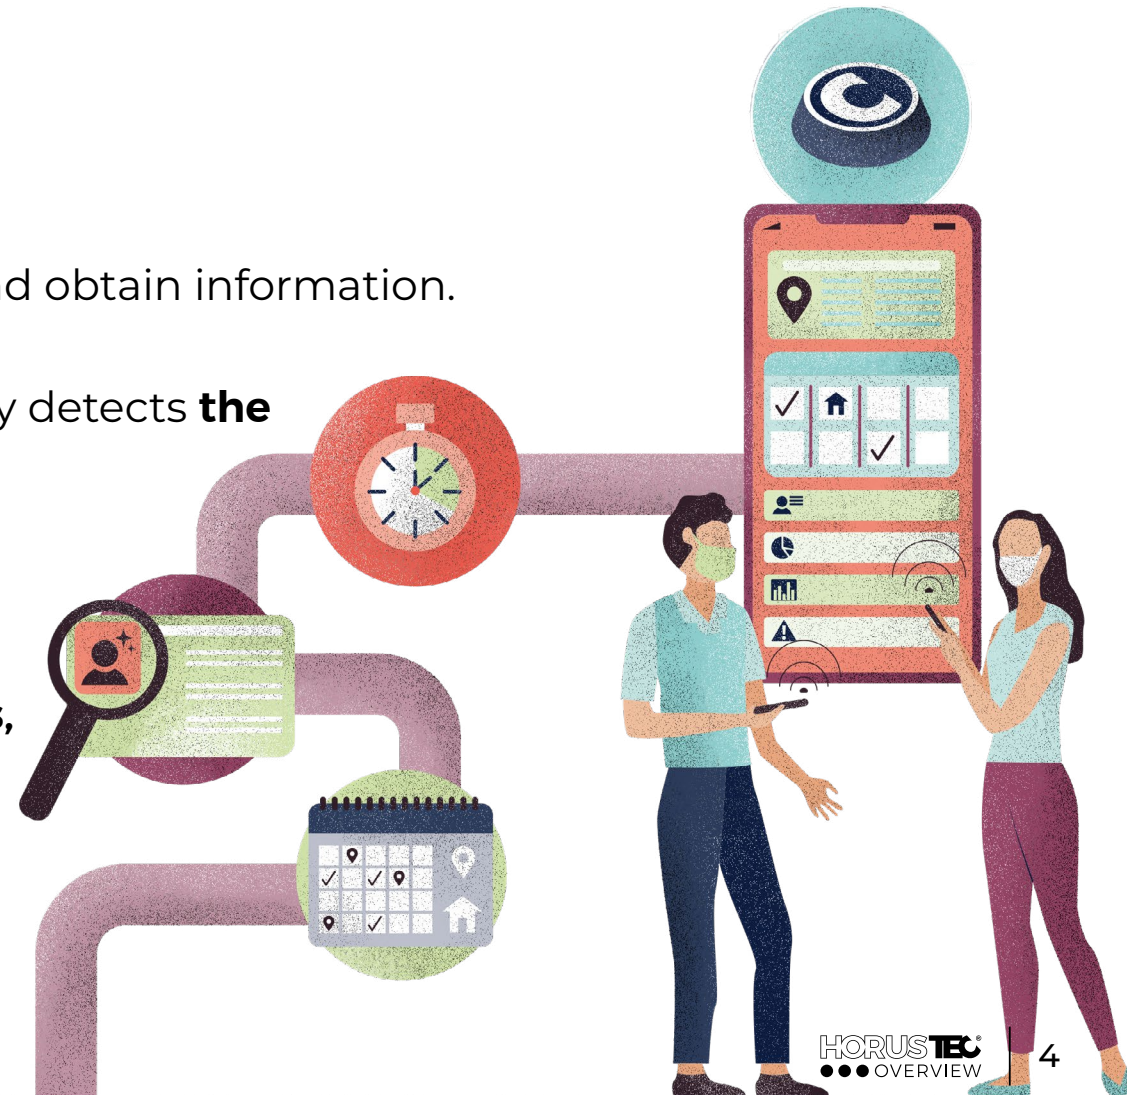

3. **Customised configuration** for each event

4. Real-time information through **mobile terminals**.

2. BLE (Bluetooth Low Energy)

1. **Remote automatic identification system** via **Bluetooth**
2. **Identify the persons attending the event** through an app and obtain information.
3. A **Bluetooth beacon is placed on the stand** and automatically detects **the app** where it is installed in smartphones.
4. Information and data can be obtained from the assistant.
5. The app can display information such as **schedules, speakers, nearby hotels**, etc.

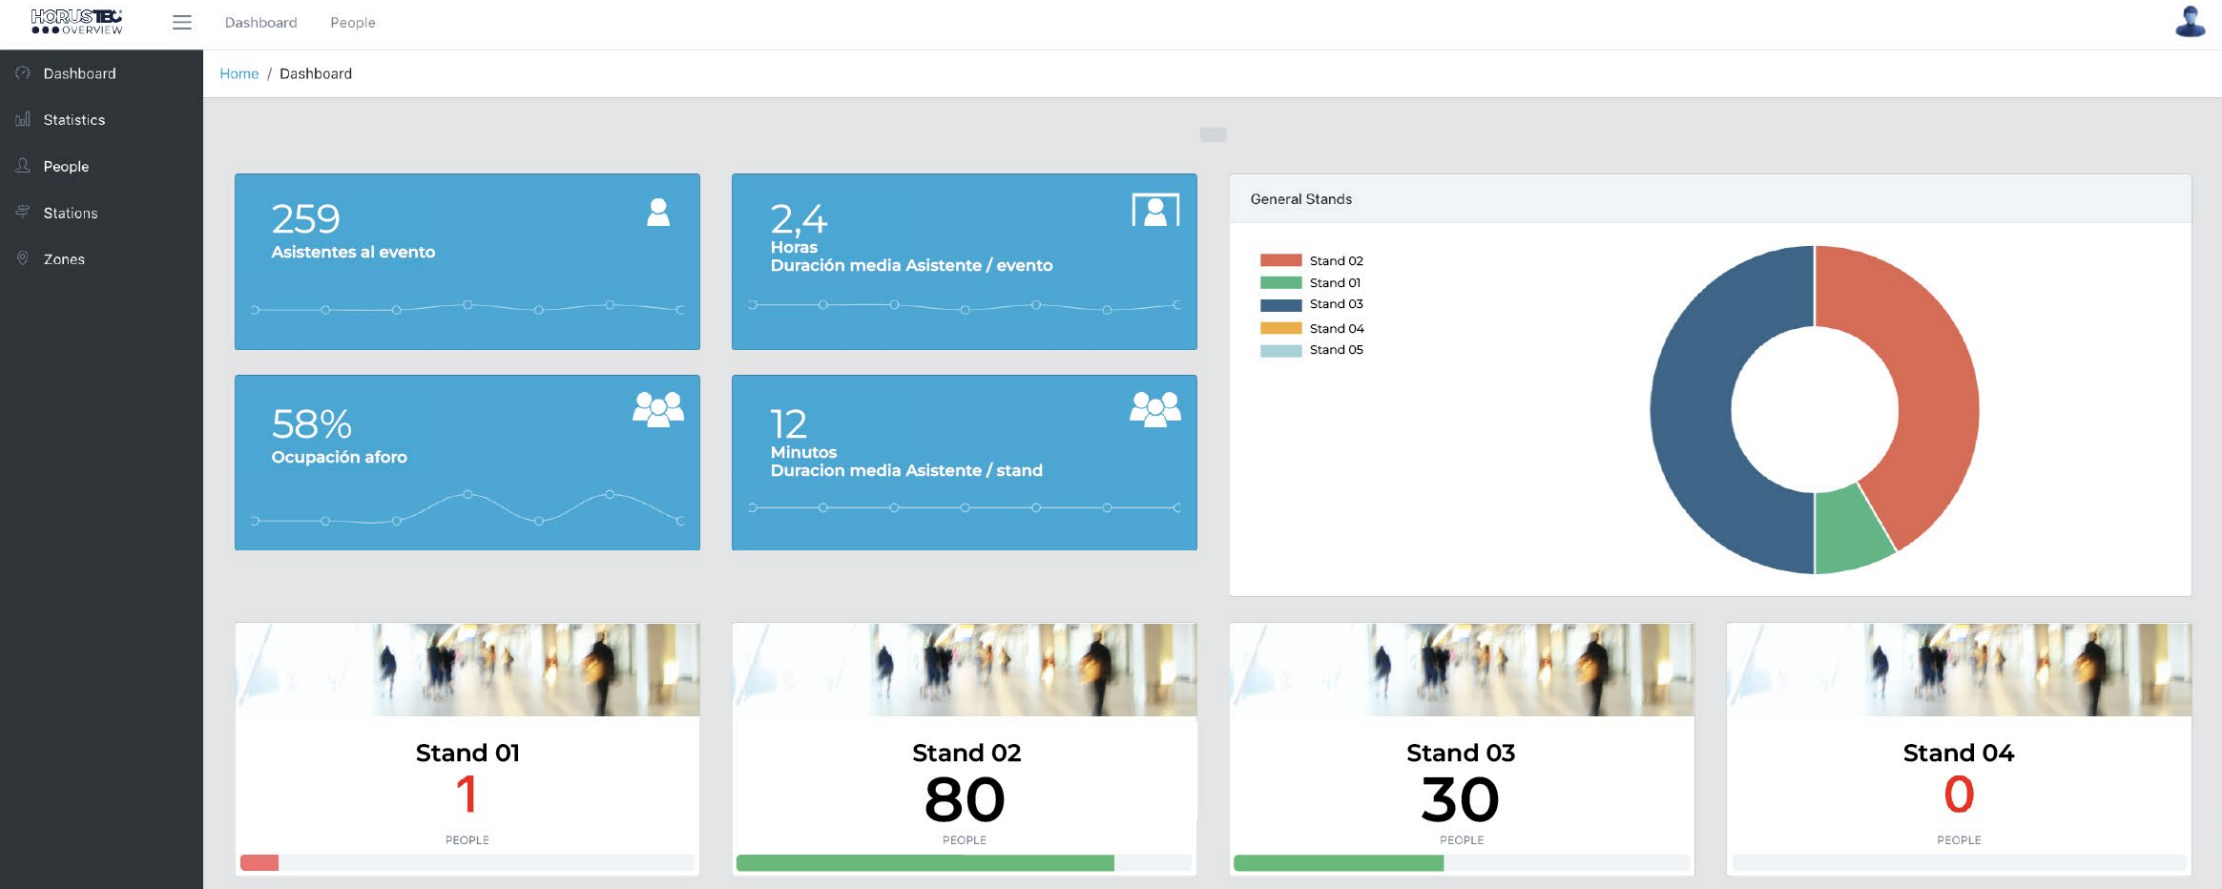

3. UWB (Ultra Wide Band)

1. This allows you **to determine how many users are in each area of the site, and their positions** at any given times.
2. Possible formation of **crowds**.
3. **Stay or standstill time of each** attendee.
4. Other **mobile resources** such as sweepers, the **cleaning path, the usage time** and **the daily cleaning time**.
5. It is **ideal for medium-sized events or fairs**.

System features

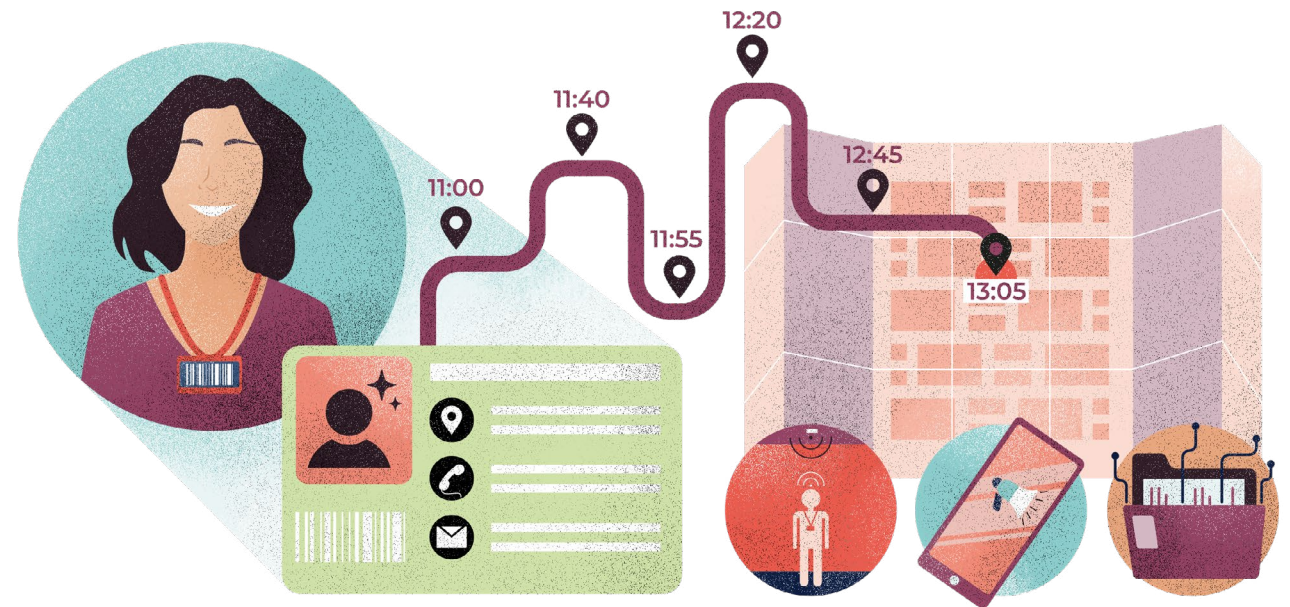

A. Safety system: The server is secured and backed up.

B. Progressive system: The application of RFID technology makes a stable system possible. This can be performed by a single person or in teams.

C. System reliability: Accurate and stable tools that are tried and tested and highly reliable.

D. Practicality of the system: The menu configuration is very clear.

E. System efficiency: It provides information on the position of attendees and creates incident warnings.
